## Interests

I am interested in leveraging AI to unravel the complexities of biology and transform the field of medicine.

(1) **Advancing AI for Medicine** : I aim to develop improved AI frameworks for data acquisition, modeling, and analysis to drive medical advancements, like as in my project [3].

(2) **Interpreting AI and Reverse Engineering** : I seek to interpret the hidden information structures in bio-AI models to uncover insights for medicine, like as in my project [2].
