## Interests

“What I cannot create, I do not understand.”

— Richard Feynman

As a physics major, I'm interested in studying emergent phenomena in LLMs and leveraging insights for efficient training and inference.

(1) **Science of LLMs** — Investigate the phenomenological mechanisms of large language models (LLMs) and their relevant applications as in my project.[1].

(2) Understanding **Neural Scaling law in LLMs**, and how to engineer them for more efficient training and inference, as in my projects [4][5].
